

# Priya Gupta

Email • GitHub • LinkedIn • Srinagar, India

## Education

**National Institute of Technology (NIT) Srinagar**

B.Tech. in Electronics and Communication Engineering • **CGPA: 8.47/10.0**

*Expected August 2027*

## Technical Skills

**Languages:** C++, Python, JavaScript (ES6+), SQL

**Web Technologies:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, RESTful APIs

**Databases & Tools:** Supabase, PostgreSQL, Git, GitHub, VS Code

## Experience

**Open Source Contributor**

*GirlScript Summer of Code (GSSoC)*

*Aug 2025 – Dec 2025*

- Selected from 10,000+ applicants; merged 15+ pull requests across 5 React-based projects.
- Improved responsive UI components and optimized layouts, increasing mobile usability scores by 25%.
- Collaborated with maintainers to resolve bugs, enhance frontend features, and ensure clean, production-ready code.

**Registration Team Member**

*Techvaganza Annual Technical Festival, NIT Srinagar*

*Apr 2024*

- Coordinated on-site registration and assisted in managing 500+ participants, ensuring smooth event execution.
- Liaised with organizing committees to streamline check-in processes and reduce participant wait times.

## Projects

**AI Trip Planner** – *Next.js, React, Supabase, Geoapify, Wikimedia*

**Live** **GitHub**

- Developed a full-stack AI-powered travel planning platform generating personalized itineraries in under 5 seconds.
- Designed secure authentication and protected routes using Supabase with JWT-based session management.
- Integrated Geoapify for real-time location search and Wikimedia APIs to deliver contextual place insights.
- Structured PostgreSQL database schemas to efficiently store and retrieve trip and user data.

**Bank Ledger System** – *Node.js, Express.js, MongoDB, Next.js*

**GitHub**

- Engineered a full-stack banking system implementing secure JWT-based authentication with bcrypt password hashing.
- Designed account, transaction, and ledger schemas to simulate real-world banking workflows.
- Implemented idempotency validation to prevent duplicate transaction processing and ensure data consistency.
- Integrated Nodemailer for automated transactional email notifications (user registration and fund transfers).
- Built RESTful APIs for transaction processing, balance retrieval, and secure logout using token blacklisting.

## Achievements

- Solved 50+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks.
- Contributed to 10+ open-source repositories through frontend enhancements and bug resolution.
- Represented NIT Srinagar in the INTER-NIT Basketball Tournament 2024.
